Donald Li

January 2018

## 1 Introduction

My name is Donald my interest in Big Data began when I first saw the median salary for Data Scientists. Then after my last semester I had my first introduction to the world of Data Science. I chose to take this class because I would love to further explore the complexities of this subjects.

I currently do not have an idea for the final project but I am sure I will discover something soon. My plans for graduation is to use the skills I have learned in school and my job to become a Data Scientist.

## 2 Equation

Equation  $a^2 + b^2 = c^2$
